Provision 7: The contractor shall comply with Resource Conservation and Recovery Act (RCRA) affirmative procurement (or 'buying recycled') requirements by giving preference in their purchasing process to products and

practices that promote recycling and other environmentally friendly practices. The contractor is also responsible for insuring that all sub-contractors comply with Affirmative Procurement (AP) requirements. Except as specifically waived in writing, for reasons of price, performance or availability, any products in the attached EPA guideline items list provided by the contractor as part of the performance of this contract must meet the minimum percentage levels of recovered materials as specified to these standard contract terms and conditions. Please refer to the attached EPA list of designated recovered materials content products (attached). On completion of work, contractor shall submit to the COR or Contract Specialist a completed "affirmative procurement reporting form" (attached) for actions taken under that specific order.

The contractor shall submit the attached "Contractor Request for Waiver for Non-EPA Comprehensive Guideline Items" (attached) as written documentation to support the decision not to acquire items meeting the minimum content levels, based on one of the three justifications below:

- a. The product is not available from a sufficient number of sources to maintain a sufficient level of competition (i.e., available from two or more sources) or is not available at a reasonable price.
- b. The product is not available within a reasonable period of time.
- c. The product does not meet the performance standards in applicable specifications or fails to meet reasonable performance standards of the agency.

See FAR clauses 52.223-4 and 52.223-9 for further guidance.

Provision 8: OPTION YEARS: Contractor shall be notified at least sixty (60) days prior to expiration date of the contract if the Government intends to exercise it's option to extend the contract for an additional year. In the event the Government fails to notify the contractor within the said sixty (60) days, but at a time less than sixty (60) days prior to the expiration date does notify the contractor that it intends to exercise the option to extend the contract for an additional year, the contractor will have the right to waive the sixty (60) days notice requirement and to perform under the option contract.

Provision 9: CCR REGISTRATION. Please review the accuracy of your Central Contractor Registration (CCR) information. The Department of Defense began using a new reporting system in fiscal year 2005. The system will automatically pull information from the CCR. It is imperative that the information for your company is correctly recorded. Awarding of a contract to a particular company could be impacted by the information found at the CCR.

Provision 10: Provide past performance proposal and evaluation information with your proposal. Reference 52.0000-4708 and the Evaluation Plan.

Provision 11: The Office of the Assistant Secretary of the Army (Manpower & Reserve Affairs) operates and maintains a secure Army data collection site where the contractor will report ALL contractor manpower (including subcontractor manpower) required for performance of this contract. The contractor is required to completely fill in all the information in the format using the following web address: <https://contractormanpower.army.pentagon.mil>. The required information includes: (1) Contracting Office, Contracting Officer, Contracting Officer's Technical Representative; (2) Contract number including task and delivery order number; (3) Beginning and ending dates covered by reporting period; (4) Contractor name, address, phone number, e-mail address, identity of contractor employee entering data; (5) Estimated direct labor hours (including sub-contractors); (6) Estimated direct labor dollars paid this reporting period (including sub-contractors); (7) Total payments (including sub-contractors); (8) Predominant Federal Service Code (FSC) reflecting services provided by contractor (and separate predominant FSC for each sub-contractor if different); (9) Estimated data collection cost; (10) Organizational title associated with the Unit Identification Code (UIC) for the Army Requiring Activity (the Army Requiring Activity is responsible for providing the contractor with its UIC for the purposes of reporting this information); (11) Locations where contractor and sub-contractors perform the work (specified by zip code in the United States and nearest city, country, when in an overseas location, using standardized nomenclature provided on website); (12) Presence of deployment or contingency contract language; and (13) Number of contractor and sub-contractor employees deployed in theater this report period (by country). As part of its submission, the contractor will also provide the estimated total cost (if any) incurred to comply with this reporting requirement. Reporting period will be the period of performance not to exceed 12 months ending September 30 of each government fiscal year and must be reported

by 31 October of each calendar year. Contractors may use a direct XML data transfer to the database server or fill in the fields on the website. The XML direct transfer is a format for transferring files from a contractor's systems to the secure web site without the need for separate data entries for each requirement data element at the web site. The specific formats for the XML direct transfer may be downloaded from the web site.

Provision 12: Prospective contractors may complete electronic annual representations and certifications at [HTTP://ORCA.BPN.GOV](http://ORCA.BPN.GOV) in conjunction with required registration in the central contractor registration (CCR) database (see FAR 4.1102). Prospective contractors shall update the representations and certifications submitted to ORCA as necessary, but at least annually, to ensure they are kept current, accurate, and complete. The representations and certifications are effective until one year from date of submission or update to ORCA.

Provision 13: Safety Practices and Guidelines. The Contractor shall conform to all federal OSHA standards applicable to the work performed and all safety practices and guidelines contained within this Statement of Work. Contractor shall strictly adhere to the contract clause entitled "Accident Prevention", Army Material Command (AMC) Regulation (R) 385-100, Safety and Occupational Health Regulation ANADR 385-1, Engineering Manual (EM) 385-1-1, 29 Code of Federal Regulations (CFR) 1926/1910, other related Department of Transportation (DOT) Regulations (49 CFR), and all local policies.

If a contractor employee is observed performing an activity in a manner inconsistent with any of the above cited regulations or is engaged in any activity that is dangerous to life, limb, or government property, the ANAD Safety Representative shall have the authority to notify the employee and/or the contractor's on-site supervisor of the hazardous activity and require correction of the hazardous activity. This authority does not preclude the Safety Representative from notifying the Contracting Officer's Representative of the hazardous condition or safety violation in appropriate situations.

If necessary, the ANAD Safety Representative shall have the authority on behalf of the Contracting Officer to require the contractor and/or its employee to stop the hazardous activity until corrective action is taken to eliminate a hazardous condition or safety violation. Said action shall not be considered to be the basis of a claim and shall be at no cost to the Government.

Contractor will notify ANAD Safety Office immediately of Reports of Inspections and/or Notices of Violation or other enforcement actions (including warning letters) received from by local, State, and Federal Regulators in which the violation is attributed to the action of the contractor or its subcontractors while working or providing services on ANAD's installation. Contractor will provide ANAD with a copy of the Inspection Report, Notice of Violation or other enforcement action, and all supporting documentation.

## STATEMENT OF WORK

### ATTACHMENT 0001

#### Depot Total Asset Visibility System Support Statement of Work

- Objective: One year on-site support of the Depot Total Asset Visibility System (DTAVS) at Anniston Army Depot. Information and responsibilities are listed below. This contract will be for a base year and four option years.
- Scope: Provide maintenance and sustainment support for the Depot Total Asset Visibility System (DTAVS), DTAVS user help desk support, and DTAVS report generation and system instrumentation/augmentation. Contractor will be expected to perform contract work on-site from 0700-1700 Monday through Friday, and on-call assistance during all other times. On-call assistance is defined as telephonic

support and direct assistance via remote VPN access as described in paragraph 7.c of this Statement of Work. Maintenance and sustainment involves knowledge of both the DTAVS system and the integrated technologies which comprise the DTAVS operating environment. These technologies include extensive knowledge of Microsoft's Visual Studio 2005 Integrated Development Environment (IDE), the C# and Visual Basic programming languages, Microsoft SQL 2000/2005 servers and T-SQL programming environments, Microsoft's IIS web server, and associated Windows 2003 operating system platforms. A detailed knowledge of the DTAVS system and its component applications is also required. The component applications include the Visual Planning System (VPS), the HighJump/AIT application, and associated interfaces between the two components. Sustainment support of the DTAVS environment assumes a capability to perform required maintenance development tasks, problem resolution/research, system upgrade/integration, and maintenance of the business solutions in support of the depot's heavy industrial complex. Business solutions are based on ANAD customer needs and crafted to drive the development of information technology solutions. The contractor must have a solid ability to document/develop end user requirements, interact with DTAVS support groups, and demonstrate an understanding of customer business processes. The contractor will be expected to plan and lead assigned projects (with minimal guidance), anticipate, research, identify and develop solutions to customer problems. The contractor must be able to fulfill the requirements described in this statement of work by employing a comprehensive knowledgeable of the ANAD DTAVS, the HighJump/AIT and interfaces to the Visual Planning System. ANAD will not provide start-up or transition training to the Contractor. Contractor must begin at the full performance level.

### 3. Provide Data Management

a. Continuing data management workload exists within DTAVS in order to maintain the "health" of the system data warehouses. Due primarily to constantly changing business rules, underlying route and process refinements, modification of shop project orders, etc. an appreciable amount of time is needed by qualified database SQL specialists to effect en mass changes to ANAD user data on a daily basis. Historically, ANAD averages three to four requests per week which require appreciable reengineering and/or conversion of SQL data and associated database structures.

b. Two other data-related support requirements include the following:

- 1) the maintenance of the staging data warehouse for verification and validation of new releases of DTAVS software.
- 2) the elimination of "unwanted" user data. Unwanted user data includes shop project order data, basket configuration data, and process data entered in error and never resolved by the user. This unwanted data has a negative ripple effect the longer it is allowed to remain within the active data store.

Problems/tasks which fall in these areas generally occur once every three to four weeks.

### 4. Provide DTAVS Help Desk Support

a. The contractor will be expected to perform Level I and Level II DTAVS Help Desk problem resolution. DTAVS Level I problems are at the user level, while level II problems involve the detailed review of application and system error logs and the possible review of application code. Level I problems/questions are averaging seven per day and require approximately three hours per day for resolution. Level II support calls are currently requiring six hours per day.

### 5. System Instrumentation/Augmentation/Reporting Capabilities

a. System instrumentation support is required by the Government and very likely will require code redesign and modification to effect the desired changes. Contractor support is needed in the following areas of DTAVS:

- 1) Provide Shortage lists (Variance Reports).

a) Baskets that are configured to contain a set number of parts are currently being routed. Based on these 'workstation requirements', VPS should provide a list of items short in these baskets. By providing a list of shortages at the time of submission, the receiving work center eliminates travel and wait times to locate parts.

2) Provide In-Scans. (Assets moving into a work area/buildings)

a) Provide code redesign and modification for in-scans (i.e., receipt at building) for subsequent cycle time and throughput analysis.

3) Provide improvements for VPS interface and navigation.

Many areas of the graphical user interface (GUI) are in need of redesign/consolidation. These changes to the navigation of VPS are needed to improve user interaction with the system. The contractor will perform an analysis of existing function navigation, recommend changes to ANAD DOIM personnel, and affect approved changes to the GUI.

4) Provide AIT/HL Interface

a) The interface module that moves data between VPS and HL is less than perfect. We have errors in the transfer of data, but user workflow is not interrupted. Possible changes to both "sides" of the interface need further investigation and subsequent implementation (required changes to the HighJump/AIT "side" of the interface will be worked in compliance with existing maintenance agreements).

5) Provide export and print tools

#### 52.000-4408 INSTALLATION SECURITY

The Anniston Army Depot (ANAD) is currently operating on a heightened state of security awareness and enforcement due to possible terrorist threats. Due to this heightened state of security, it is imperative that no unauthorized materials of any type be brought onto or left unattended on the installation. For this reason the Contractor must have a process in place to receive and store materials and have visibility of the location of those materials at all times while on ANAD. This includes construction materials, equipment, and miscellaneous items. This visibility/accountability of materials applies to the Contractor, its subcontractors, and its material suppliers.

Further, all Contractor, subcontractor, and material supplier employees are prohibited from bringing personal belongings of any nature onto the installation if such items are to be left unattended at any time.

The Contractor is further required to have a plan of action for implementing these procedures and must submit it to the Contracting Officer upon request. This plan of action must include a provision for informing all employees and subcontractors of these procedures. The plan of action must also address monitoring and procedures the Contractor has in place to ensure compliance with this contractual provision.

Should the Contractor fail to comply with this mandatory contractual provision, the Contractor may be held responsible for all direct and indirect cost incurred by the Government in identifying, securing, segregating, removing, and otherwise properly disposing of improper or abandoned materials/equipment.

(6) See clause entitled Identification of Contractor Employees for Contractor employees working on Anniston Army Depot.

(2) Contractors working within the CLA must be escorted by a member of the security force or an ANAD employee qualified to escort. Escorts remain with the Contractor the entire time the Contractor is within the CLA.

(3) The requirement for a security escort must be coordinated through the Contracting Officer to DLE two weeks in advance of initial required work date. The number of available escorts is limited, which may affect the amount of work area available to the Contractor each day.

(4) Escorts will be conducted with a "line of sight" being maintained at all times between the escort and the Contractor. This will limit the amount of distance one crew may spread out to perform work. Escorts may direct Contractor employees regarding the distance to travel from the escort.

(5) Contractors working within the CLA may be required to cease work and evacuate from the CLA up to six (6) times per year for exercises and/or emergencies. The duration of the cease work periods will vary, but normally they will not exceed 24 hours. These interruptions will be at no cost to the Government.

(e) Hours of Work:

WORK HOURS	RECEIVING HOURS	DAY(S) OF WEEK
------------	-----------------	----------------

7:00 AM - 4:30 PM	7:00 AM - 2:00 PM	Monday - Thursday
7:00 AM - 3:30 PM	7:00 AM - 2:00 PM	Every other Friday
CLOSED	7:00 AM - 2:00 PM	Every other Friday
CLOSED	CLOSED	Saturdays, Sundays, and Federal Holidays

(1) Federal Holidays. Federal holidays may cause the Depot to be closed for one or more of the work days identified. The contract performance period has taken this possibility into consideration.

(2) Shutdown Periods. The Government may choose to shutdown for a week or portions of a week as stated below. During this shutdown, and unless otherwise stated, only those Government personnel essential for equipment/facility maintenance will be permitted work.

4 <sup>th</sup> of July Holiday	Safety Stand-Down Day*
Christmas Holiday	Employee Appreciation Day*

\*Safety Stand-Down Day and Employee Appreciation Day generally occur on a Friday (8-hour day). Safety Stand-Down Day consists of either two half-days occurring at six-month intervals or one full workday per year. Employee Appreciation Day generally occurs on a Friday (half of an 8-hour day) and is usually held in the afternoon. The Contractor's services may not be required during these periods. In such cases, the Contractor will be notified in writing by the Government. These interruptions will be at no cost to the Government.

(3) Schedule Changes. When situations warrant, the Government may change the hours of operation to adjust for certain conditions, i.e., weather conditions (extreme heat or cold). For example, during summer production, shops may begin work at 6:00 am and leave work at 3:30 pm to avoid the afternoon heat. The Contractor shall be provided as much advance written notice as possible when these situations occur and will be expected to support any schedule change provided by the Contracting Officer.

(f) Traffic: The Contractor will be required to conform to Depot regulations concerning:

- (1) Designated routes
- (2) Parking regulations

(3) Insurance--See clause entitled "Insurance Requirements." The Contractor will also insure that all POVs brought on the installation are fully insured for minimum amount of personal injury and personal damage liability required by Federal Acquisition Regulation 28.307-2.

(g) Highway Barricades, Warning Signs, and Parking: The Contractor shall comply with Depot Regulation ANADR 190-5 and Manual on Uniform Traffic Control Devices, ANSI D6.1, Part VI, Latest Edition. Contractors are permitted to drive their vehicles inside buildings to load and unload supplies and equipment. However, when finished loading and unloading, the Contractor should move the vehicle outside to a designated parking space.

(h) Temporary Structures: The Contractor shall comply with Corps of Engineers Manual (EM) 385-1-1.

(i) Fire Prevention and Protection: The Contractor shall comply with all fire prevention measures prescribed in the installation fire prevention and protection regulation, a copy of which is on file in the office of the Contracting Officer. A written hot work permit shall be obtained from the installation fire department for use of any heat producing devices such as blowtorches, portable furnaces, tar kettles, or gas and electric welding and cutting equipment. The Contractor shall be liable for any fire loss to Government property attributable to negligence on the part of the Contractor, including failure to comply with fire prevention measures prescribed by the terms of this contract.

(j) Utilities: Government-owned and operated utilities are adequate for the needs and use of the Contractor as well as the Government. All reasonably required amounts of water and electricity are available to the Contractor without charge.

(k) Safety and Accident Prevention: In addition to contract clause entitled "ACCIDENT PREVENTION," FAR 52.236-13, which may be incorporated by reference, the provisions of AMCR 385-100, ANADR 385-1, Engineering Manual (EM) 385-1-1, and 29 CFR 1926/1910 shall be strictly adhered to. Contractors working in the CLA will be issued protective masks by the installation in accordance with ANAD Respiratory Screening Plan. The Contractor will be responsible for the reimbursement of the cost of any protective equipment damaged due to negligence, destroyed, or lost by contracted personnel. The referenced regulations and plan are available in the Safety Office for review by contractors.

(l) Vehicle Searches: All vehicles entering, moving throughout, and exiting ANAD are subject to random searches as directed by the Depot Commander.

(m) Land Use Control: Contractors who will be required to "disturb soil" in the performance of this contract shall review and strictly adhere to the Standard Operating Procedure for Land Use Control Implementation. The SOP is available in the Directorate of Risk Management, Building 1, for review by Contractors.

(n) Cellular telephones with built-in cameras are prohibited on this installation. If a cell phone with camera is found, that cell phone is subject to confiscation, and any violation may be punishable by fine or imprisonment or both.

(o) Air Emissions: The contractor is responsible for early coordination with the Directorate of Risk Management on any action that might result in air emissions (dust, volatile substances, etc). ANAD's Title V Air Permit requires the installation to obtain construction permits for new or modified air sources. The Alabama Department of Environmental Management (ADEM) must issue a construction permit before ANAD purchases and installs any equipment which will produce air emissions. Installation and/or start-up of this equipment without the proper permit and coordination with ADEM is a violation of State and federal environmental law. The violation could result in a possible civil penalty or fine up to \$250,000 from the Federal Environmental Protection Agency. Contractors considering a new process or device, or a modification to an existing unit, must first coordinate with the Environmental Compliance Division, Directorate of Risk Management.

(p) Exercise Events: Contractors working on the installation are expected to participate in LEAN thinking, Value Stream Analysis, Rapid Improvement Events, and Six Sigma activities that may last from one to seven weeks in duration. These efforts, as defined below, are an integral part of the process improvements of ANAD on our journey toward building a LEAN manufacturing facility. The COR will provide detailed instructions when your involvement is required.

LEAN thinking is a coordinated response to today's highly competitive environment. LEAN production is aimed at the elimination of waste in every area of production including customer relations, product design, supplier networks and factory management. Its goal is to incorporate less human effort, less inventory, less time to develop products, and less space to become highly responsive to customer demand while producing top quality products in the most efficient and economical manner possible.

A Value Stream Analysis (VSA) is an event that documents the current process, the planned future process and an action plan to get to the planned future process. The VSA normally last three to four days and includes representatives from all aspects of the process.

A Rapid Improvement Event is a seven-week process that focuses on events where teams of people from a broad range of parts of the business gather to streamline a process. The first three weeks are used to select an area and topic, create the team, and plan for the event. The fourth week is the actual event where waste is identified, removed, and changes to processes made. The last three weeks are to ensure changes are continuing to be used and process is working correctly.

Six Sigma is the leading quality improvement program for a rigorous and disciplined methodology that uses data and statistical analysis to measure and improve a company's operational performance by identifying and eliminating "defects" in manufacturing and service-related processes. Six Sigma differs from traditional quality improvement programs in its focus on input variables. While traditional process improvement methods depend upon measuring outputs and establishing control plans to shield customers from organizational defects, a Six Sigma program demands that problems be addressed at the input root cause level, thereby eliminating the need for unnecessary inspection and rework processes.

(q) ANAD Network: For access to the ANAD network, send a letter stating that a National Agency Check (NAC) has been initiated and furnish a copy of the SF 85P, Questionnaire for Public Trust Positions, for review prior to issuance of an interim password. The results of the NAC investigation shall be furnished to the Security Management Office, Security Office Identifier number A077, for the final adjudication.

(f) Late submissions, modifications, revisions, and withdrawals of offers:

(1) Offerors are responsible for submitting offers, and any modifications, revisions, or withdrawals, so as to reach the Government office designated in the solicitation by the time specified in the solicitation. If no time is specified in the solicitation, the time for receipt is 4:30 p.m., local time, for the designated Government office on the date that offers or revisions are due.

(2)(i) Any offer, modification, revision, or withdrawal of an offer received at the Government office designated in the solicitation after the exact time specified for receipt of offers is "late" and will not be considered unless it is received before award is made, the Contracting Officer determines that accepting the late offer would not unduly delay the acquisition; and--

(A) If it was transmitted through an electronic commerce method authorized by the solicitation, it was received at the initial point of entry to the Government infrastructure not later than 5:00 p.m. one working day prior to the date specified for receipt of offers; or

(C) If this solicitation is a request for proposals, it was the only proposal received.

(ii) However, a late modification of an otherwise successful offer, that makes its terms more favorable to the Government, will be considered at any time it is received and may be accepted.

(3) Acceptable evidence to establish the time of receipt at the Government installation includes the time/date stamp of that installation on the offer wrapper, other documentary evidence of receipt maintained by the installation, or oral testimony or statements of Government personnel.

(4) If an emergency or unanticipated event interrupts normal Government processes so that offers cannot be received at the Government office designated for receipt of offers by the exact time specified in the solicitation, and urgent Government requirements preclude amendment of the solicitation or other notice of an extension of the closing date, the time specified for receipt of offers will be deemed to be extended to the same time of day specified in the solicitation on the first work day on which normal Government processes resume.

(5) Offers may be withdrawn by written notice received at any time before the exact time set for receipt of offers. Oral offers in response to oral solicitations may be withdrawn orally. If the solicitation authorizes facsimile offers, offers may be withdrawn via facsimile received at any time before the exact time set for receipt of offers, subject to the conditions specified in the solicitation concerning facsimile offers. An offer may be withdrawn in person by an offeror or its authorized representative if, before the exact time set for receipt of offers, the identity of the person requesting withdrawal is established and the person signs a receipt for the offer.

(g) Contract award (not applicable to Invitation for Bids). The Government intends to evaluate offers and award a contract without discussions with offerors. Therefore, the offeror's initial offer should contain the offeror's best terms from a price and technical standpoint. However, the Government reserves the right to conduct discussions if later determined by the Contracting Officer to be necessary. The Government may reject any or all offers if such action is in the public interest; accept other than the lowest offer; and waive informalities and minor irregularities in offers received.

(h) Multiple awards. The Government may accept any item or group of items of an offer, unless the offeror qualifies the offer by specific limitations. Unless otherwise provided in the Schedule, offers may not be submitted for quantities less than those specified. The Government reserves the right to make an award on any item for a quantity less than the quantity offered, at the unit prices offered, unless the offeror specifies otherwise in the offer.

(k) Central Contractor Registration. Unless exempted by an addendum to this solicitation, by submission of an offer, the offeror acknowledges the requirement that a prospective awardee shall be registered in the CCR database prior to award, during performance and through final payment of any contract resulting from this solicitation. If the Offeror does not become registered in the CCR database in the time prescribed by the Contracting Officer, the Contracting Officer will proceed to award to the next otherwise successful registered Offeror. The Past Performance factors are listed below:
  - a. Quality
  - b. Delivery
  - c. Cost Control
  - d. Experience

Past Performance will be rated as either "Neutral", "Poor", "Good", or "Excellent." The criteria for evaluation of each factor is attached. The technical evaluation team will conduct a Performance Risk Assessment based on the offeror's past performance rating. Performance Risks are those associated with the offeror's ability to perform the

solicitation requirements as indicated by that offeror's record of past and current relevant performance. The Risks assigned will be: "Unknown", "Very High", "Low", and "Very Low."

4. Experience and technical approach are equal and when combined are slightly more important than past performance. Experience, technical approach and past performance when combined are slightly more important than price.

(b) Options. The Government will evaluate offers for award purposes by adding the total price for all options to the total price for the basic requirement. The Government may determine that an offer is unacceptable if the option prices are significantly unbalanced. Evaluation of options shall not obligate the Government to exercise the option(s).

(c) A written notice of award or acceptance of an offer, mailed or otherwise furnished to the successful offeror within the time for acceptance specified in the offer, shall result in a binding contract without further action by either party. Before the offer's specified expiration time, the Government may accept an offer (or part of an offer), whether or not there are negotiations after its receipt, unless a written notice of withdrawal is received before award.

**QUALITY SURVEILLANCE PLAN**  
**For**  
**DTAVS Support**

1. **INTRODUCTION.** The Federal Acquisition Regulation (FAR) requires Government surveillance of all contracts to give reasonable assurance that efficient methods and cost controls are being utilized. The plan is a permanent part of the contract file and may be changed as needed.

2. **PURPOSE.** The purpose of the Surveillance Plan is to:

- a. Properly control and monitor contract number TBD.
- b. Ensure the Government receives fair value for each dollar spent.

3. **SCOPE.** This Surveillance Plan pertains to the Depot Total Asset Visibility System (DTAVS) support contract number TBD and all modifications issued thereto.

4. **CONTRACT MONITORING REQUIREMENTS.** The Contract Monitor for the DTAVS support contract is Gary Parris, AMSTA-AN-IWPC, telephone 4512. The Contract Monitor has overall responsibility for monitoring contractor performance on all work performed under this contract. Duties include:

- 1. Monitor performance of Statement of Work (SOW) to ensure contractor performs within the scope.
- 2. Attempt to resolve through interface with contractor management any problems that arise. Unresolved problems will be elevated to the Contracting Officer.
- 3. Monitor and brief upper management on the status of the contract and contractor performance as required.
- 4. Review each contractor invoice, including supporting documentation (time sheets, travel info, receipts, etc.) to ensure accuracy and correctness of all charges. If required, make adjustments to invoices, indicating rationale. Forward verified invoices to appropriate administrative and paying offices.

6. Perform acceptance inspections of all deliverables specified, if required.
7. Continuously evaluate contractor performance in terms of quality, quantity, and timeliness. Immediately alert the Contracting Officer if problems arise.

# EVALUATION PLAN

## DTAVS Support

1. A technical team will evaluate all quotations.
2. The technical team will evaluate the **Experience and Technical Approach Factors** as **trade-off** evaluation factors. The technical specifications must be met as a minimum.
  - a. Experience with DTAVS, Visual Studio 2005, T-SQL, C#, and other operating systems and servers identified in the Statement of Work (SOW).
  - b. Technical Approach to the SOW.
  - c. Past Performance
  - d. Price

3. **Past Performance**, attached, is a **trade-off** evaluation factor. It will be evaluated using the attached table of factors and definition of ratings. The Past Performance evaluation will be conducted by the technical team and the contract specialist, since this is not a formal source selection board and the evaluations factors are not complex tradeoff evaluations. The Past Performance factors are listed below:
  - a. Quality
  - b. Delivery
  - c. Cost Control
  - d. Experience

Past Performance will be rated as either "Neutral", "Poor", "Good", or "Excellent." The criteria for evaluation of each factor is attached. The technical evaluation team will conduct a Performance Risk Assessment based on the offeror's past performance rating. Performance Risks are those associated with the offeror's ability to perform the solicitation requirements as indicated by that offeror's record of past and current relevant performance. The Risks assigned will be: "Unknown", "Very High", "Low", and "Very Low."

## PAST PERFORMANCE EVALUATION PLAN

<b>* DELIVERY</b> Adherence to delivery schedules and availability requirements..	There is no meaningful relevant record of past performance	It is extremely doubtful that the offeror will successfully perform the required effort	Little doubt exists that the offeror will successfully perform the required effort	Essentially no doubt exists that the offeror will successfully perform the required effort

\*\* Offerors with no relevant past performance will receive a neutral rating.

All operations involving, unloading, storage, and hauling of ordnance, explosive, and incendiary ordnance material other than small arms ammunition. These differentials are only applicable to work that has been specifically designated by the agency for ordnance, explosives, and incendiary material differential pay.

**\*\* UNIFORM ALLOWANCE \*\***

If employees are required to wear uniforms in the performance of this contract (either by the terms of the Government contract, by the employer, by the state or local law, etc.), the cost of furnishing such uniforms and maintaining (by laundering or dry cleaning) such uniforms is an expense that may not be borne by an employee where such cost reduces the hourly rate below that required by the wage determination. The Department of Labor will accept payment in accordance with the following standards as compliance:

The contractor or subcontractor is required to furnish all employees with an adequate number of uniforms without cost or to reimburse employees for the actual cost of the uniforms. In addition, where uniform cleaning and maintenance is made the responsibility of the employee, all contractors and subcontractors subject to this wage determination shall (in the absence of a bona fide collective bargaining agreement providing for a different amount, or the furnishing of contrary affirmative proof as to the actual cost), reimburse all employees for such cleaning and maintenance at a rate of \$3.35 per week (or \$.67 cents per day). However, in those instances where the uniforms furnished are made of "wash and wear" materials, may be routinely washed and dried with other personal garments, and do not require any special treatment such as dry cleaning, daily washing, or commercial laundering in order to meet the cleanliness or appearance standards set by the terms of the Government contract, by the contractor, by law, or by the nature of the work, there is no requirement that employees be reimbursed for uniform maintenance costs.

**\*\* NOTES APPLYING TO THIS WAGE DETERMINATION \*\***

Under the policy and guidance contained in All Agency Memorandum No. 159, the Wage and Hour Division does not recognize, for section 4(c) purposes, prospective wage rates and fringe benefit provisions that are effective only upon such contingencies as "approval of wage and hour, issuance of a wage determination, incorporation of the wage determination in the contract, adjusting the contract price, etc." (The relevant CBA section) in the collective bargaining agreement between (the parties) contains contingency language that wage and hour does not recognize as reflecting "arm's length negotiation" under section 4(c) of the Act and 29 C.F.R. 5.11(a) of the regulations. This wage determination therefore reflects the actual CBA wage rates and fringe benefits paid under the predecessor contract.

The duties of employees under job titles listed are those described in the "Service Contract Act Directory of Occupations," Fifth Edition, April 2006, unless otherwise indicated. Copies of the Directory are available on the Internet. A links to the Directory may be found on the WHD home page at <<http://www.dol.gov/esa/whd/>> or through the Wage Determinations On-Line (WDOL) Web site at <<http://wdol.gov/>>.

REQUEST FOR AUTHORIZATION OF ADDITIONAL CLASSIFICATION AND WAGE RATE {Standard Form 1444 (SF 1444)}

Conformance Process:

The contracting officer shall require that any class of service employee which is not listed herein and which is to be employed under the contract (i.e., the work to be performed is not performed by any classification listed in the wage determination), be classified by the contractor so as to provide a reasonable relationship (i.e., appropriate level of skill comparison) between such unlisted classifications and the classifications listed in the wage determination. Such conformed classes of employees shall be paid the monetary wages and furnished the fringe benefits as are determined. Such conforming process shall be initiated by the contractor prior to the performance of contract work by such unlisted class(es) of employees. The conformed classification, wage rate, and/or fringe benefits shall be retroactive to the commencement date of the contract. {See section 4.6 (C)(vi)} When multiple wage determinations are included in a contract, a separate SF 1444 should be prepared for each wage determination to which a class(es) is to be conformed.

The process for preparing a conformance request is as follows:

- 1) When preparing the bid, the contractor identifies the need for a conformed occupation) and computes a proposed rate).
- 2) After contract award, the contractor prepares a written report listing in order proposed classification title), a Federal grade equivalency (FGE) for each proposed classification), job description), and rationale for proposed wage rate), including information regarding the agreement or disagreement of the authorized representative of the employees involved, or where there is no authorized representative, the employees themselves. This report should be submitted to the contracting officer no later than 30 days after such unlisted class(es) of employees performs any contract work.
- 3) The contracting officer reviews the proposed action and promptly submits a report

of the action, together with the agency's recommendations and pertinent information including the position of the contractor and the employees, to the Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor, for review. (See section 4.6(b)(2) of Regulations 29 CFR Part 4).

4) within 30 days of receipt, the Wage and Hour Division approves, modifies, or disapproves the action via transmittal to the agency contracting officer, or notifies the contracting officer that additional time will be required to process the request.

5) The contracting officer transmits the Wage and Hour decision to the contractor.

6) The contractor informs the affected employees.

Information required by the Regulations must be submitted on SF 1444 or bond paper.

When preparing a conformance request, the "Service Contract Act Directory of Occupations" (the Directory) should be used to compare job definitions to insure that duties requested are not performed by a classification already listed in the wage determination. Remember, it is not the job title, but the required tasks that determine whether a class is included in an established wage determination. Conformances may not be used to artificially split, combine, or subdivide classifications listed in the wage determination.

b. Positive documentation of performance.

3. Negative incentives. Negative incentives will apply when Contractor performance fails to meet the minimum performance standards listed at paragraph 1 above. Negative Incentives applicable to this contract are listed below.

4. All incentives will be applied as appropriate at the discretion of the Contracting Officer.
